

EXECUTIVE SUMMARY

EPIC Certified Business Intelligence Developer with 2+ years at Genesis Healthcare Systems designing and delivering Power BI dashboards, SQL data models, and Epic Caboodle/Clarity reporting solutions across clinical, operational, financial, and executive stakeholders. Delivered production reports, eliminated major manual reporting processes, and contributed to Agile sprint cycles and peer code review.

CORE COMPETENCIES

BI & Reporting: Power BI (dashboards, DAX, data transformation) • SQL • Data Modeling • SSRS
Healthcare Data: Epic Caboodle • Epic Clarity • Clinical, Operational & Financial Reporting • HIPAA compliance
Dev & Process: Azure DevOps / Git • Agile / Jira • Python • R • Requirements Gathering • Data Validation • End-User Training & Documentation

PROFESSIONAL EXPERIENCE**Genesis Healthcare System, Zanesville, OH****March 2024– Present****Business Intelligence Developer I**

- Designed and delivered Power BI dashboards and SSRS reports for C-suite executives, clinical, operations, and finance stakeholders, translating healthcare data into actionable insights and supporting enterprise reporting and decision-making
- Wrote and optimized SQL queries for stored procedures and views in Epic Caboodle and Clarity, improving report performance and supporting scalable healthcare analytics reporting
- Built semantic data models to support multiple clinical and operational departments, reducing manual reporting processes for managers and improving reporting efficiency by ~25%
- Eliminated a major manual reporting process by developing a command center radar dashboard for capacity and throughput monitoring, reducing reporting time by 40% and enabling faster bottleneck identification for operational and analytics teams
- Handled production support incidents and service tasks for BI solutions, resolving SLAs within 90% of remaining time to ensure timely BI support and system reliability while minimizing reporting downtime and user impact
- Gathered and analyzed stakeholder requirements across enterprise teams, translating business needs into clear technical scope and BI solution specifications while ensuring alignment with data standards and HIPAA requirements
- Increased adoption of BI tools by creating documentation and conducting training sessions for end users across clinical and operational teams

Lexon, Dublin, OH**May 2022 – Aug 2022****Junior Developer (Internship)**

- Developed and optimized a Java-based automotive application improving overall performance by 15% while maintaining and enhancing HTML and CSS components
- Wrote and optimized SQL queries within an Oracle database to support application functionality and data retrieval
- Collaborated with cross-functional teams in an Agile environment to deliver software solutions aligned with business requirements

Information Services, Delaware, OH**March 2021– August 2023****Information Technology Assistant**

- Maintained and updated 15+ web pages and documentation materials using HTML and PHP, reducing content errors by 25% and improving overall content quality and consistency
- Delivered end-user training and technical support to 50+ users across diverse groups, increasing system adoption by 30% and improving digital literacy
- Served as the technical resource supporting 300+ users across the campus network, resolving issues within SLA and maintaining 99%+ system uptime to ensure optimal performance and user experience

EDUCATION**Ohio Wesleyan University, Delaware, Ohio****B.A. Computer Science • B.A. International Studies****Graduated Aug 2023****CERTIFICATIONS**
