

WORK EXPERIENCE

Business Analyst (Consultant), AI Consultants Inc. (Client: Mohawk Industries) – Raleigh, NC Aug 2023 – Present

- Framed and solved a high-impact business challenge at Mohawk Industries (~\$11B revenue): diagnosed a manual, email-driven claims process across 4 stakeholder groups, developed hypotheses on root-cause bottlenecks, and led end-to-end solution delivery that reduced claim resolution time by ~35%.
- Wrote SQL queries and applied statistical analysis to identify 5 operational bottlenecks driving SLA breaches; prioritized by revenue impact, reducing claims requiring manual intervention by 40% across 1,000+ annual claims.
- Designed 9 automated workflow modules improving end-customer experience and dealer go-to-market processes; defined product requirements, business rules, and acceptance criteria across 50+ JIRA epics/stories spanning 6 Agile releases.
- Partnered with IT, Operations, and Sales teams to scope feasibility, lead implementation, and build a monitoring plan; coordinated UAT across 3 business units, resolving 100+ defects and achieving zero critical-defect releases.

Business Intelligence Analyst (Intern), America Needs You – New York, NY Jan 2022 – May 2023

- Conducted market research and consumer behavior analysis on 40,000+ cross-border payment records; developed targeted insights and weekly KPI dashboards in Power BI for C-suite, directly shaping quarterly product strategy and go-to-market roadmap decisions.
- Built and validated analytical models to connect drivers of payment compliance risk to historical pipeline behavior; identified gaps in 4+ data pipelines and recommended procedural fixes adopted across 3 teams, resulting in zero regulatory penalties.
- Collaborated across IT, Finance, Operations, and Marketing to translate regulatory requirements into 30+ JIRA epics; led UAT for 5 compliance releases, achieving 100% regulatory acceptance, reducing onboarding time by ~30%.

Marketing Analyst, XOR Labs – Chandigarh, India Jan 2020 – May 2021

- Gathered and documented requirements for e-commerce analytics and payment processing enhancements through 15+ stakeholder workshops and 100+ interviews, translating findings into development-ready specifications that supported 3 major platform releases.
- Performed risk analysis and impact assessments for 3 payment processing changes; contributed to UAT planning and tracked defects end-to-end in JIRA, achieving zero critical payment failures post-release.
- Built 10+ interactive Databricks dashboards surfacing real-time revenue trends, order frequency, and SKU performance metrics across 70,000+ SKUs, enabling business teams to make data-backed decisions on pricing and inventory allocation.

PROJECTS

Rental Price Analysis & Geospatial Visualization (Spring 22, SQL, Tableau)

- Designed an interactive Tableau dashboard analyzing 50,000+ Zillow rental listings across all 50 US states, enabling users to explore pricing trends by geography, season, and market tier.

Demand Forecasting & Pricing Model (Fall 22, R Studio, SQL, Snowflake, Databricks)

- Applied statistical modeling and SQL-based data transformations on 500K+ SKU order records to build a scalable demand forecasting pipeline; outputs directly informed product pricing strategy and inventory allocation decisions.

Consumer Market Analysis – Airbnb (Spring23, SQL, Databricks, Delta Lake)

- Conducted end-to-end market research on 40,000+ consumer listing records using SQL and Databricks; identified pricing trends and customer segment behavior to deliver strategic recommendations on go-to-market positioning.

EDUCATION

Inclusive Product Management Accelerator(IPMA), University of Washington Aug 2023– Dec 2023

Master of Business Administration in Business Analytics, Pace University Jan 2022 – May 2023

GPA 3.8/4.0, Recipient of Lubin Business School Leadership Graduate Fellowship.

Bachelor of Engineering in Computer Science, Thapar University Aug 2015– Dec 2019

CGPA 7.25/10 (Minor in Machine Learning), Awarded merit-based scholarship.

CERTIFICATION & SKILLS

CSPO | CSM | Google Data Analytics Certificate | Tableau | Microsoft Power BI | Agile/Scrum Practitioner

Analytics & Modeling: SQL (Snowflake, PostgreSQL, Oracle, Databricks), Statistical Modeling, R, Tableau, Power BI

Business Analysis: Market Research, Consumer Insights, Risk Analysis, KPI Reporting, BRD/FRD, Process Flows, UAT

Tools & Methods: Microsoft Copilot, Claude, JIRA, Confluence, MS Visio, Appian (BPM), Agile/Scrum, Kanban, Waterfall
