

ABHAY PRASANNA

3931 Sheldon Dr NE, Atlanta, GA 30342 | +1-440-319-7210 | Abhay_Prasanna@mckinsey.com

PROFILE

Partner at McKinsey & Company with 13 years at the firm, advising chief executives and C-suite leaders of North American utilities and global integrated energy companies on enterprise AI rewiring (redesigning core business processes so AI is embedded in day-to-day work) and on procurement and supply chain transformation. Engagements led have delivered **15%+ sustainable third-party spend savings** and **\$1B+ per year in recurring client value**, alongside durable client capability across people, process, data, and technology. Serves as faculty for the firm's partner-level AI training program and develops the AI-enabled procurement, contracting, and agentic-workflow methods now applied across the firm's energy client base.

PROFESSIONAL EXPERIENCE

McKinsey & Company

Atlanta, GA · 2013–Present

Partner, Energy & Materials and Operations Practices (previously Associate Partner, Engagement Manager, Associate)

Enterprise AI rewiring

- **Large U.S. utility** — Built the enterprise AI value case, delivery hub, and multi-wave roadmap; stood up AI governance and risk controls; launched production workflows across priority functions, moving the enterprise from isolated pilots to scaled deployment.
- **Global integrated oil & gas major** — Operationalized an agentic AI “factory” that factorizes core workflows and redeploys them to teams of AI agents, establishing a repeatable model for workflow-level transformation.
- **Merchant power generator** — Deployed analytics-enabled operating routines to improve combined-cycle fleet heat-rate and dispatch decisions, sustaining a **1–3% efficiency uplift** through a repeatable performance cadence.

Procurement, contracting, and supply chain

- **Multiple regulated utilities and merchant energy players** — Led end-to-end procurement transformations spanning category management, supplier performance, and source-to-pay controls, delivering **15%+ savings** with step-change improvement in compliance and internal user experience.
- **Utilities and energy clients** — Pioneered generative-AI contract analytics at scale, surfacing obligations, terms, and risk exposure across large contract estates to reduce value leakage, accelerate redlines and approvals, and strengthen negotiation readiness.
- **Utility-scale renewables platform** — Redefined contracting and supplier performance management, improving portfolio IRR by **2–3%** through risk and terms optimization and disciplined vendor governance.
- **U.S. upstream operator** — Directed procurement transformation across well construction, MRO, logistics, and rentals, identifying **>\$100M** of opportunity and institutionalizing category playbooks and governance to sustain savings.

Operating model, capability centers, and large-scale transformation

- **Global integrated oil & gas major** — Designed and launched a **1,000+ FTE** global capability center and rewired the underlying delivery workflows, delivering approximately **\$300M per year** in labor arbitrage and productivity gains.
- **Downstream refining company** — Served as integrator of a multi-year, **\$1B+ per year** enterprise transformation, establishing the operating model, performance management system, and delivery cadence required to sustain benefits at scale.

FIRM LEADERSHIP, TEACHING, AND KNOWLEDGE DEVELOPMENT

- **Faculty, partner-level AI training program** (“AI in Motion”) — Designed and teach a recurring curriculum for McKinsey Partners, Associate Partners, and team leaders on applied AI and agentic workflows, including original frameworks for AI automation maturity, human-in-the-loop review, and the risks of AI-assisted knowledge work.
- **Client-facing thought leadership** — Author of the firm's point of view on AI in procurement and supply chain for energy clients, including comparative operating-model archetypes for enterprise AI adoption used in CxO advisory work.
- **Counselor and senior advisor** to chief procurement and supply chain officers at major North American energy companies; mentors and develops consulting teams across the firm's energy and operations practices.

PRIOR EXPERIENCE

- **Joshi Technologies International**, Ahmedabad, India — *Field Supervisor*, 2010–2011. Led production facility operations for a mature onshore oilfield with 32 producing wells; supervised a crew of 15 and built the field's technical training and safe-working program.
- **Baker Hughes Incorporated**, Rajasthan, India — *Completions / Field Engineer*, 2008–2010. Supervised well completion operations under a \$50M products and services contract; led frontline safety and performance routines and crisis-response teams.
- Earlier internships with **Sears Holdings** (network optimization, 20% delivery cost savings), **Unilever**, and **Procter & Gamble / Gillette**.

EDUCATION AND HONORS

The Ohio State University, Fisher College of Business — M.B.A., Operations (minors: Strategy, Finance), 2013. GPA 3.93/4.00; Fisher Fellow (full tuition waiver and stipend); GMAT 770, 99th percentile; Beta Gamma Sigma Honor Society.

Birla Institute of Technology & Science, Pilani — B.E. (Hons.), Electrical & Electronics Engineering, 2008. GPA 9.38/10; merit scholarship; Director's Honors List; Student Council leader.
