SUMMARY

AI Solution Architect with 4+ years consulting delivery experience and hands-on GenAI solution design across federal, enterprise, non-profit clients. Translates strategy into executable delivery plans across entire software development lifecycle

EDUCATION

Texas A&M University College Station, Texas, US
Master of Science in Management Information Systems August 2024 – May 2026

SASTRA Deemed University Thanjavur, Tamil Nadu, IN
Bachelor of Technology in Computer Science and Engineering July 2016 – May 2020

EXPERIENCE

Texas A&M University College Station, Texas, US
AI Solutions Architect (Graduate Assistant) October 2025 – March 2026

- Architected GenAI solution for automated essay evaluation in active faculty collaboration, reducing grading effort by 60% through structured workflow redesign, designing multi-client deployment architecture serving 2 US universities
- Led end-to-end workstream delivery from use case framing, architecture design, roadmap creation, and UAT, balancing security, privacy, and adoption considerations to optimize for research goals and operational cloud cost constraints

Alcon Lake Forest, California, US
AI Solutions Engineer Intern May 2025 – August 2025

- Designed and delivered enterprise AI copilot for 300+ internal users owning solution approach end-to-end on AWS infra
- Drove 40% reduction in customer response time via AI-enabled automation of third-party risk assessment questionnaires
- Redesigned architecture optimizing RAG vector store, delivering 70% infrastructure cost savings against legacy solution
- Facilitated cross-functional communication with engineering, security, and QA teams ensuring multi-stakeholder buy-in

Texas A&M University College Station, Texas, US
AI Solutions Architect (Graduate Assistant) September 2024 – May 2025

- Led client engagement for Agastya International Foundation as sole technical lead under Dr. Shrihari Sridhar, facilitating discovery sessions and solution architecture for AI-powered instructor onboarding portal, managed delivery end-to-end
- Presented solution design iterations & progress to non-profit leadership maintaining regular stakeholder communication
- Built reference architecture with guided conversational AI sessions using Python, TypeScript, PostgreSQL, AWS infra, performing calculated cloud infrastructure tradeoffs to reduce cost without sacrificing user experience and research goals

Deloitte Consulting LLP Chennai, Tamil Nadu, IN
AI Solutions Engineer June 2021 – July 2024

- Engineered AI guardrails for US Federal Gov. client, building FastAPI backend services addressing adversarial AI risks
- Designed input/output moderation architecture using open-source models, defining security controls for GenAI systems
- Optimized architecture eliminating 3 redundant scanners via prompt design, boosting threat detection efficiency by 30%
- Setup AI evals framework with synthetic data generation and conducted tests, uncovering and patching 3 vulnerabilities
- Ensured SOX audit readiness for US State Government building and validating RBAC, Segregation of Duties controls

PROJECTS

Competency Tracker (Client: Plymouth State University) January 2025 – May 2025

- Led 6-person delivery team, ran requirements gathering sessions with PSU stakeholders, architected student performance analytics platform on AWS with customizable KPI dashboards, owned CI/CD workflows to achieve 1-click deployment

SKILLS

Consulting: Solution Architecture, Value Mapping, Executive Storytelling, Agile Delivery, Change Management, Adoption

AI: Data Governance, API Integrations, Analytics, KPI Design, GenAI Delivery, Responsible AI, AI Evaluation, MLOps

Technical: Python, TypeScript, FastAPI, PostgreSQL, LangChain Ecosystem, Docker, Git, Linux, Terraform, AWS Bedrock

LEADERSHIP

President – Business Information Technology Students September 2024 – Present

- Hosting workshops with industry alumni, running outreach campaigns, representing MIS program to 75+ grad students
