

SWAPNIL K. TAMSE

Engineering Leader | Financial Services | Trading Technology | AI & Cloud

(347) 792-4879 | SwapnilTamse@gmail.com | [SwapnilTamse.com](https://www.swapniltamse.com) | [LinkedIn.com/in/SwapnilTamse](https://www.linkedin.com/in/SwapnilTamse)

EXECUTIVE SUMMARY

Engineering leader with 16+ years of building and scaling high-performance technology organizations in financial services. Most recently managed 15+ engineers across multiple squads at Prudential Financial owning full people management lifecycle including hiring, performance management, and organizational design. Deep domain expertise in trading systems, fixed income operations, and capital markets technology. Proven track record delivering AI/cloud transformations that directly impact business outcomes. Hands-on builder who codes alongside teams while driving strategic roadmaps at the executive level.

CORE COMPETENCIES

Engineering Team Leadership (15+ Reports) - Full Hiring & Performance Management - Trading Systems & Fixed Income - AI/ML Implementation (AWS Bedrock, Kendra, RAG) - Cloud Architecture (AWS/Azure) - Agile Delivery & DevOps - Executive Stakeholder Management - Vendor Procurement & Budget Oversight

PROFESSIONAL EXPERIENCE

Director of Strategic & AI Initiatives | **Infinity Tech (Contracted to PGIM)** | Newark, NJ 2026 – Present

- Placed at PGIM (Prudential Global Investment Management) as a senior engineering consultant, providing continuity of technical and AI leadership following full-time tenure
- Architecting and delivering AI proof-of-concept systems for financial services clients using RAG pipelines, LLM integrations, and cloud-native tooling
- Serving as technical authority in client discovery and pre-sales engagements, translating complex AI/engineering capabilities into business value for C-suite and technical audience
- Leading technical scoping and solution design for prospective client engagements, defining architecture, effort estimates, and delivery approach

Lead Engineering Manager | **Prudential Financial** | Newark, NJ

2023 – 2026

Organizational Leadership

- Directly managed 15+ engineers across multiple squads supporting Global Investment Operations owning end-to-end people: hiring, onboarding, performance reviews, career development, and when necessary, performance exits
- Full-cycle recruiting accountability: authored job descriptions, conducted technical and behavioral interviews, extended offers, and managed headcount planning in partnership with HR and senior leadership
- Promoted 3+ engineers to senior/lead roles through structured mentorship and stretch assignments; maintained 95%+ team retention in a highly competitive talent market
- Contributed to vendor budget decisions and technology procurement, partnering with finance and senior leadership to evaluate build-vs-buy tradeoffs

Technical Delivery & Innovation

- Led modernization of the Advisor Portal, directed squads to design and deliver automated solutions replacing manual legacy workflows, reducing operational overhead and improving advisor efficiency across Global Investment Operations
- Championed and delivered Amazon Kendra AI integration: led team through research, proof-of-concept, and production rollout, replacing legacy search and dramatically improving advisor workflow speed (EODB 20+)
- Established Agile delivery practices and technical standards across the organization; improved delivery velocity by 30% while sustaining quality and compliance requirements
- Led a 5-person cross-functional team to win the inaugural AWS Chaos Engineering GameDay Hackathon; subsequently defined and rolled out resilience engineering standards organization-wide
- Piloted multiple Generative AI adoption strategies, evaluating AWS Bedrock and other tooling to identify viable paths to production for the organization

R&D Software Engineer | Renaissance Learning, Inc. | New York, NY

2020 – 2023

- Led end-to-end design of critical student data management modules using C#.NET and AWS, ensuring robust solutions for enterprise-wide adoption
- Revamped technical documentation from legacy knowledge bases to Confluence, reducing information retrieval time by 70% and support calls by 90%
- Championed engineering inclusion during Mergers & Acquisitions (Flocabulary, Freckle, FastBridge), bridging cultural and technical gaps for acquired teams
- Led procurement of strategic software products (Gremlin, AWS); implemented AI bot (Krita.ai) to automate DEI learning company-wide, reducing HR training overhead and improving developer learning by 50%

Senior Software Engineer | Choice Logistics, Inc. | New York, NY

2019 – 2020

- Automated release pipelines and implemented DevOps best practices to streamline QA and Production deployments
- Developed logistics transparency solutions using C#/SQL, enhancing operational visibility and cost estimation accuracy

Senior Software Engineer → Acting CIO | Vantage Commodities Financial Services | New York, NY

2012 – 2019

- Directed technology roadmaps for C#, C++, and AWS platforms; aligned engineering output directly with sales and trading revenue objectives as Acting CIO
- Spearheaded full migration from on-prem COLO to Rackspace then to AWS, re-architecting legacy financial applications for scalability and resilience
- 7+ years of deep operational knowledge in Commodities and Fixed Income (settlements, compliance, middle-office) directly bridging technical and business domains in a trading environment

EDUCATION

Master of Science, Computer Science | New York University (Dean's Scholarship)

2011

Bachelor of Engineering, Information Technology | Mumbai University

2009

INNOVATION, AWARDS & THOUGHT LEADERSHIP

- KarmaLedger (2026): GenAI application using Azure AI / Semantic Kernel SDK for intent recognition and relationship scoring - karmaledger.swapniltamse.com
- HOA Chatbot (2025): Production RAG system using Claude LLM - email classification, vector search, and resident-facing summary dashboard
- ParisTransitHelper.com (2025): Mobile-first AI web app using live transit APIs for English-speaking tourists
- ASCEND Leadership (2025): Co-led the ASCEND NJ Annual Conference - largest Pan-Asian professional network in the USA
- Top 100 Influential Non-Resident Indians (peaked #28, 2013) - Pinstorm Media
- NASA STS-134 Social Media Curator (2011): Coded and curated the official STS-134 Tweetup for Space Shuttle Endeavour launch

TECHNICAL SKILLS

Languages: Java, Python, C# (.NET Core), SQL, React, JavaScript/Node.js

Cloud & AI: AWS (Kendra, Bedrock, Lambda, EC2), RAG Architectures, Vector Databases, Semantic Kernel

Architecture: Microservices, Event-Driven Architecture, REST APIs, CI/CD Pipelines, Chaos Engineering
