

Summary

ServiceNow Platform Developer and Administrator with 3+ years of experience delivering platform enhancements, workflow automation, SPM configuration, workspace solutions, and integration support across enterprise ITSM and SPM environments. Manages the full technical delivery lifecycle-from requirements and design through scripting, testing, environment promotion, and post-release validation including platform upgrades, third-party integrations, production troubleshooting, and implementation partner coordination.

Skills

Development & Scripting: Flow Designer, Business Rules, Client Scripts, UI Actions, UI Policies, ACLs, Script Includes, Notifications, Scheduled Jobs.

Platform & Modules: ITSM, SPM (Demand, Project, Resource), Service Operations Workspace, Project Workspace, Service Catalog, Incident, Change, Request, Knowledge, CMDB, Platform Analytics.

Integrations & Data: REST/SOAP APIs, Import Sets, Transform Maps, MID Server, Power BI, Microsoft Graph/Teams, BeyondTrust, SharePoint REST, OAuth, JSON/XML.

Platform Operations: Platform Upgrades, Update Sets, Clone Management, Regression Testing, UAT, Microsoft Entra ID/Azure AD, DEV/TEST/PROD Management, ServiceNow Impact.

Work Experience

Central New Mexico Community College (CNM)

Application Analyst- ServiceNow

Aug 2025 - present

- Deliver ServiceNow platform enhancements across **ITSM, SPM**, Workspaces, and Service Catalog-from requirements and design through scripting, testing, update set deployment, and post-release validation across DEV, TEST, and PROD.
- Configure and support **Strategic Portfolio Management** across demand management, project tracking, resource allocation, Project Workspace data mapping, project status reports, and portfolio reporting-including Power BI integration endpoints for executive and PMO visibility into project, demand, and roadmap data.
- Build and maintain platform logic using Flow Designer, Business Rules, Client Scripts, UI Actions, and UI Policies to support workflow automation, approval routing, catalog fulfillment, notification conditions, and access enforcement.
- Maintain and troubleshoot REST/SOAP integrations with Power BI (SPM reporting), Microsoft Graph/Teams (project and timesheet notifications), BeyondTrust (remote support from Incident), and SharePoint REST (CAB calendar) including OAuth validation and post-clone/upgrade integration verification.
- Configure and support Change Management processes including CAB Workbench meeting definitions, pre-CAB and CAB approval workflows, and change approval routing — troubleshooting CAB manager approval behavior, UI Action conditions, and approval visibility differences across platform views.
- Support ServiceNow access and security model decisions across ITSM, SPM, and Platform Analytics, including role/group structure, inherited access review, license impact analysis, and remediation of access issues affecting workspace and reporting visibility.
- Coordinate with ServiceNow implementation partners on SPM setup, workspace configuration, and platform enhancement delivery reviewing partner-built solutions, supporting UAT, transitioning configuration to internal ownership, and applying ServiceNow Impact accelerator insights (Instance Health) to platform improvement planning.
- Manage import sets, transform maps, field mappings, and MID Server data sources to support inbound data ingestion, environment-specific field validation, and source-to-target troubleshooting.
- Lead platform upgrade activities including the Zurich upgrade, covering upgrade readiness coordination, plugin validation, regression testing with business and admin testers, SOW behavior validation, clone support, post-upgrade defect resolution, and production runbook and stakeholder communication.
- Troubleshoot Microsoft Entra ID and Azure AD issues affecting ServiceNow authentication, role and group assignment, and remote instance connectivity, coordinating with infrastructure and identity teams as needed.
- Built and maintain dashboards and analytics reports to improve visibility into request volumes, SLA performance, and resource utilization.

GS Advanced Resources LLP

ServiceNow Administrator

Mar 2022 - Jul 2023

- Configured and maintained ITSM workflows across Incident, Problem, Change, Request, and Knowledge modules to support consistent IT service delivery.
- Built Service Catalog items, catalog variables, approval workflows, and fulfillment logic using Flow Designer and Business Rules.

- Supported CMDB administration by validating CI data from inbound data sources, troubleshooting import set and transform map issues, and documenting CI ownership and relationships used by Incident and Change processes.
- Developed REST and SOAP integrations to exchange incident, change, and asset-related data between ServiceNow and external systems.
- Automated asset refresh notifications and change coordinator validations using Moveworks API and Flow Designer, reducing manual operational effort.
- Designed and implemented Business Rules and Client Scripts to control record behavior, enforce data standards, and support ITSM workflows.
- Managed import sets, transform maps, and inbound data load processes for field mapping and data transformation.
- Administered ACLs, roles, groups, and form layouts to enforce access controls and role-based platform visibility.
- Supported update set packaging, environment promotion, regression testing, and production deployment activities.

ServiceNow Analyst

Apr 2021 - Mar 2022

- Translated ITSM process requirements into platform configuration changes in partnership with business and technical stakeholders.
- Assisted with CMDB documentation covering configuration item relationships, ownership, and operational dependencies.
- Coordinated **user acceptance testing** (UAT) by defining test scenarios and coordinating validation activities.

Education

Master of Science in Engineering, Oklahoma Christian University | Edmond, OK *Dec 2024*

Bachelor of Technology in Mechanical Engineering, Jawaharlal Nehru Technological University, Kakinada, India

Certifications

ServiceNow Certified System Administrator
