1.404.944.6660 | abhijtc.iitg@gmail.com | <https://www.linkedin.com/in/abhijit-choudhary/> | Parsippany, NJ

SEASONED DATA SCIENTIST | GENERATIVE AI | NLP · NLU · LLM | Georgia Tech & IITG Alum

Seasoned Data Scientist with 15+ years of experience delivering AI-driven high-stake transformations. Proven record of owning data science tracks from classic machine learning to modern Generative AI with a consultative business problem mindset. Pioneered the design and deployment of ML/AI-driven solutions across multiple greenfield projects, leveraging components from classical NLP to Generative AI and transformer architectures. I thrive at the intersection of AI product strategy, applied research, and scalable implementation, turning rapid prototypes into production-grade systems that accelerate business processes and deliver measurable, multi-million-dollar impact.

Strategic Problem Solver | Executive Presence | Hands-On Leadership | People Developer

Universities Attended:

Degree	University	Field of Study	Graduation Date
MASTER OF SCIENCE	Georgia Tech, Atlanta	Analytics	May-2025
MASTER OF SCIENCE	Indian Institute of Technology, Guwahati, India (I.I.T.G.)	Mathematics & Computing	May-2005
BACHELOR OF SCIENCE	Banaras Hindu University (B.H.U.)	Statistics (Honors)	May-2002

CORE COMPETENCIES:

PRODUCT DATA SCIENTIST: Hands-on expert in taking ideas from whiteboard to production, rapidly prototyping AI solutions and scaling them into enterprise products. Proficient across modern data science stacks, Python scripting, and ML algorithms.

CONSULTATIVE COLLABORATOR: Bridge business and technology through clear storytelling and stakeholder alignment. Known for building confidence and driving adoption via empathy, collaboration, and servant leadership.

STRONG DATA SCIENCE ACADEMICS: Academic foundation with MS in Analytics (Georgia Tech), MS in Mathematics & Computing (IIT Guwahati), and BS in Statistics (Hons, BHU Varanasi)—providing deep mathematical grounding and ML intuition.

MODERN NLP & GENERATIVE AI: Played critical roles in NLP, LLM, and GenAI initiatives, leveraging ensembles of n-grams, classic ML models, BERT, successive generations of LLMs, and Google Document AI to build scalable, fit-for-purpose pipelines integrated into production.

CAREER HIGHLIGHTS:

BALANCED CROSS-POLINATED SKILLS: Hands-on Senior Data Scientist at ADP skilled in driving end-to-end data journeys—from whiteboard to production. Bring a rich blend of product, management consulting, and system integration experience across Salesforce, Infosys, and Accenture, with proven global experience across the USA, Singapore, and India.

PDF DIGITIZATION (ADP – NEXT GEN PAYROLL): Led two generations of PDF digitization powering client onboarding automation. **1.0:** Delivered core modules—Custom NER, document/page classification, and a cross-model validation framework combining Computer Vision and NLP. **2.0:** Directed the **ADP–Google collaboration**, leading fine-tuning and layered validation for **Google Document AI**, cutting onboarding time from 3 days to under 2 hours.

CONTEXTUAL DISAMBIGUATION (JPMC via Accenture): Built a firm-wide NLP framework matching **6.3M metadata columns** to **225K glossary terms** using co-occurrence matrices and Sentence BERT, enabling contextual enterprise search.

AGENTIC WORKFLOW ORCHESTRATION (Georgia Tech M.S. Practicum): Designed a **LangGraph-based multi-agent** workflow automating pet-air logistics inquiry-to-order via Streamlit UI—turning a high-touch process into a scalable digital experience.

TECHNOLOGY INNOVATION: Proven track record of hands-on innovation across NLP, LLM, and GenAI technologies—integrating cutting-edge research into production-ready solutions driving measurable business impact. Championing AI adoptions

AREAS OF EXPERTISE

Development: Python scripting, Pandas, NumPy, Data Structures, PyCharm / VS Code, Bitbucket, Streamlit.

ML/NLP Toolkits & Frameworks: Statistical Learning, Hyperparameter Tuning, n-grams, Finetuned Transformers, Google Doc AI, LangGraph, Prompt Engineering, ChatGPT-4.x, Sonnet 3.7, Scikit-learn, NLTK, SpaCy, GloVe, Word2Vec, USENCss, SBERT, Cosine Similarity, REGEX, Matplotlib.

Applied Data Science Use Cases: Document Classification, Custom NER, Section Tagging, AI Validation Frameworks, Contextual Disambiguation, Semantic Search, Anomaly Detection, Customer Churn, Marketing Effectiveness, Default Prediction, Credit & Business Strategy.

Infrastructure & MLOps: AWS, GCP, Azure ML, Hugging Face, Model Deployment, Vector Search.

Cross-Team Collaboration Touchpoints: Rapid Prototyping & Evaluation, Data Science Road mapping, JIRA Workflow Management, Stakeholder Alignment Across Product, Engineering & Business Teams

PROFESSIONAL EXPERIENCE

ADP Product Development Next Gen Payroll Platform | Parsippany, NJ | Mar 2021–Present

Core Team Tasked with Automating Document Digitization Firmwide

SENIOR DATA SCIENTIST, DOCUMENT DIGITIZATION

ADP is a leading provider of payroll, HR, and talent management solutions. As new clients migrate from third-party systems, they bring legacy payroll data—typically in PDF format—that must be rapidly converted into structured outputs. Played a critical role in designing scalable, vendor-agnostic NLP/ML pipelines to automate data extraction and validation, significantly accelerating client onboarding with high accuracy and operational efficiency.

Delivered

- Led two generations of ADP's enterprise PDF digitization initiative that automated payroll data extraction and validation, accelerating client onboarding from competitor systems into ADP's digital ecosystem.
- **PDF Digitization 1.0 (Computer Vision + NLP):** Delivered key components of an ensemble framework combining Computer Vision and NLP models, including **Custom NER, document/page classification**, and an **AI validation framework** that cross-checks model outputs to ensure near-perfect extraction accuracy.
- **PDF Digitization 2.0 (Google Document AI + GenAI Post-Processing):** Led the **ADP–Google collaboration**, defining fine-tuning guidelines, optimizing out-of-box accuracy, and adding layered validation to mitigate hallucinations such as missing or misclassified data—reducing client onboarding from three days to under two hours. **A 36X acceleration.**

Impact: Accelerated client onboarding by 36x and established ADP's enterprise framework for document intelligence, now serving as the firmwide standard.

ASTIR Technologies | South Plainfield, NJ | Mar 2019 – Jul 2022

ASTIR Family of Companies provides Consulting Specialists in Systems & Technologies

SENIOR DATA SCIENTIST

Worked with multiple Fortune 500 clients on greenfield NLP projects focused on Information Retrieval, Contextual Disambiguation, and Novelty Detection. Delivered high-impact AI solutions and mentored incoming data science consultants to support client-specific needs.

Delivered

- Developed a scalable contextual disambiguation framework for JPMC to power firmwide metadata search, enabling non-trivial insights from massive table inventories across multiple lines of business.
- Designed and implemented a semantic search solution for Johnson & Johnson, allowing users to input queries and retrieve the top 5 intent-matched documents from large medical research repositories.

- Built a rare fraud (novelty) detection tool for **FINRA** to identify one-in-a-million anomalous trades. Triggered high reconstruction error spikes when odd trade patterns were detected in real-time streams.

SALESFORCE | Portland, OR | March 2018 – Jan 2019

Business Technology Group of Salesforce responsible for Product Enhancement

PRODUCT ANALYST (DATA SCIENCE)

Acted as the liaison between business stakeholders and development teams across Salesforce, managing the intake, prioritization, and acceptance of monthly requirements. Oversaw the full lifecycle from initiation through UAT and deployment.

Delivered

Supported the design and rollout of an ensemble customer churn prediction model for the Customer Success Group, leveraging global product usage metadata from customer subscriptions.

INFOSYS LIMITED | India & USA CA | Dec 2011 – March 2018

Data Science and Analytics Consulting Unit of Infosys

SENIOR LEAD ANALYST (DATA SCIENCE)

Led and delivered multiple high-impact data science projects for clients across geographies. Contributed to pre-sales activities, while also managing and mentoring junior team members.

Delivered

- Led the design and execution of A/B testing to evaluate marketing effectiveness across campaigns for Truist Digital Marketing.
- Built a loan default prediction model using multiple logistic regression, along with monitoring reports for Truist Default Operations and Reporting Strategy.
- Led enhancement and support of credit scoring and portfolio monitoring tools for Capital One Auto Finance (Credit & Business Strategy unit).
- Mentored, coached, and upskilled a team of four direct reports.

EARLY CAREER EXPERIENCE | India and Singapore | Jul 2005– Nov 2010

Infosys Technologies, SAS Institute, Accenture Consulting Singapore

MULTIPLE FIRMS (SOFTWARE ENGINEER | TECHNOLOGY CONSULTING ANALYST)

Took early leadership in analytics-focused initiatives well before the data science boom—contributing as a product owner, transformation lead, and SME across enterprise-scale systems and customer analytics platforms. Worked across India and Singapore on product builds, enterprise transformations, and reporting infrastructures for leading global firms.

Delivered

- **Nobel Analytics, Singapore | Co-Founder (Nov 2010 -Oct 2011):** Launched consulting startup with operations in Raffles Place and Bangalore; participated in Accenture FinTech Innovation Labs.
- **Accenture Consulting, Singapore | Senior Analyst (Jul 2008 -Nov 2010) | Large Scale System Integration Transformation:** Led delivery of real-time defect tracking and system monitoring for an 80+ system integration project; supported go/no-go testing and exec reporting for clients like the Ministry of Defense and Starhub Telecom. Supported pre-sales.
- **SAS R&D, Pune, India | Software Engineer (Jul 2007 – Jun 2008) | Customer Analytics Development:** Contributed to development of SAS Customer Analytics suite (Segmentation, Retention, Cross-sell); hands-on ownership of Foundation Mart data prep and analytic modules.
- **Infosys Ltd, Pune, India | Software Engineer, FINACLE (Jul 2005- Jul 2007) | Oracle to PDF Reporting & Analytics Infrastructure:** SME and SPOC for Unix-to-PDF reporting infrastructure; migrated legacy batch reports to Crystal-based analytics platform for Finacle banking clients.
