PROFESSIONAL SUMMARY

Architectural designer and BIM Lead with 5+ years owning design programs from kickoff to construction-ready delivery leading the program and executing the work directly. 3D modelling with Revit and AutoCAD at expert level. Hands-on in clash detection, model assembly, BIM 360 / ACC governance, and LiDAR as-built scanning. Managed concurrent multi-disciplines with consultant coordination and pipeline deliverables, surfacing blockers, keeping teams moving. When operational requirements shift mid-program, I adapt without losing design accuracy or timeline. Design with intent, love and passion for an inclusive environment.

SKILLS & TOOLS

Design Execution: Revit (Expert) · AutoCAD (Expert) · 2D/3D composite design · Construction documents · Design package delivery

BIM & Model Coordination: Model assembly hierarchy · Discipline linking · Visibility management · ACC/BIM 360 project setup · Fabrication-level modelling

Clash Detection: Multi-discipline model validation · Conflict identification · Coordination reports · Engineering resolution · GC handoff

Program Management: Monday.com · Monograph · Motion · Timeline tracking · Risk surfacing · Stakeholder communication · Kickoff to closeout

Scan Technology: LiDAR scanning (Polycam) · Point cloud capture · As-built model development · Existing conditions documentation

Additional Tools: Navisworks · Dynamo · Bluebeam · SketchUp · Rhino · Grasshopper · Enscape · D5 Render · Lumion · Adobe Creative Suite · Smartsheet · Microsoft 365

PROGRAM DELIVERY: KEY OUTCOMES

Composite Design Program · Columbia Shores (160+ Units, WA)

Led multi-building design program across townhomes, clubhouse, and amenity building simultaneously. Owned timeline, scope alignment, and deliverable tracking across civil, structural, MEP, landscape, and interior disciplines from site planning through permit-ready documentation. Zero post-submission rework.

Operational Design Under Pressure · Women's Health Clinic + Retail Plaza (20,000 SF)

The program leads across six disciplines schematic through construction administration. City flagged a public realm deficiency mid-review with a hard deadline. Used the live BIM model to develop, coordinate, and package a complete civic plaza design in one working day. Approved without comment. Zero architectural comments on full permit submission.

BIM Governance · Firm-Wide Build from Scratch

The firm ran entirely on AutoCAD with templates, standards, and coordination protocols. Designed and implemented complete Revit and ACC infrastructure: project templates, Firm standards, parametric family libraries, real-spec material data, model hierarchy standards, and discipline linking workflows. All projects migrated. Edit cycles cut from hours to minutes. Five designers trained on the new system.

Clash Detection · Commercial + Industrial Portfolio

Executed discipline linking, visibility management, and clash detection across Bombshells TI (9,500 SF), Ford Pro Showroom (50,000 SF), St. Thomas Retail (9,000 SF), and Columbia Shores Townhomes. Produced coordination reports, led engineering resolution, and managed each program through to conflict-free GC handoff. Model structure is what makes detection scalable when assembly hierarchy is right, scale is just a number.

As-Built Scan Documentation · Adaptive Reuse

Deployed LiDAR scanning via Polycam to document existing conditions of an adaptive reuse building. Developed an accurate as-built model from point cloud data used as the design base, eliminating redundant field verification cycles.

Fabrication-Level BIM · Healthcare Project

Developed custom stair assembly and exterior awning system in Revit to fabrication-ready detail geometry, connections, material tolerances. Coordinated directly with fabrication contractors using the model as the primary communication tool. Package submitted and permitted.

PROFESSIONAL EXPERIENCE

Architectural Designer / BIM Program Lead

Draftco Designs + WHL Architecture · Kennewick, WA, USA · Mar 2023 – Jun 2025

- Owned design and documentation delivery across 10+ commercial, industrial, healthcare, and residential programs running simultaneously Women's Health Clinic (20,000 SF), Ford Pro Showroom (50,000 SF), Columbia Shores Townhomes (160+ units), Canal Drive Apartments (42 units), Southridge Plaza (12,000 SF), 50+ spec homes.
- Managed program timelines, tracked deliverables, and coordinated consultant outputs using Monday.com, Monograph, and Motion.

- Built firm's complete BIM and ACC infrastructure from zero; executed clash detection and design validation across commercial and industrial projects.
- Produced fabrication-level Revit models for custom architectural elements; coordinated directly with fabrication contractors through permitting.
- Deployed LiDAR scanning for adaptive reuse as-built documentation.
- Trained 5 junior designers in Revit, ACC, BIM standards, and coordination workflows.

Architectural Designer · Civic & Institutional

VAMA Communications · Ahmedabad, India · Aug 2019 – Jan 2021

- Led design, 3D modelling, and documentation for four nationally significant civic institutions (Rajasthan Assembly Museum, Jallianwala Bagh, UP Police Museum, Gandhi Memorial). Coordinated structural, fabrication, and multimedia teams across concurrent government commissions.

Architect / Founder · Independent Practice

KTA Studio · Ahmedabad, India · Oct 2019 – Jan 2021

- Full project ownership from design through documentation on residential, commercial interior, and retail projects.

Graduate Teaching Assistant · Professional Practice

University at Buffalo, SUNY · Buffalo, NY · Jan 2022 – Jun 2022

- Supported 80+ M.Arch students in architectural law, AIA contracts, and construction administration.

EDUCATION

Master of Architecture (M.Arch) · Urban Design Specialization

University at Buffalo, SUNY · Buffalo, NY · Feb 2021 – Feb 2023

- Focus areas: masterplanning, systems thinking, computational design, community design. Best Architectural Proposal Up-Rise, Buffalo Central Terminal (6 competing teams).

Bachelor of Architecture (B.Arch)

Gujarat Technological University · Ahmedabad, India · Jun 2014 – Jun 2019

CREDENTIALS

- Associate AIA · #40796538
- NCARB Record · Full AXP Logged · ARE in Progress
- AutoCAD Certified Professional, Autodesk
- Licensed Architect · India COA CA/2019/117928

Visa: H-1B · Cap-exempt · No lottery · Available immediately
