EDUCATION

University of Utah, David Eccles School of Business

Salt Lake City, UT

Master of Science in Information Systems

EXPERIENCE

University of Utah

Salt Lake City, UT

Physical Security Specialist III

February 2026 – Present

- Engineer, configure, deploy, and troubleshoot enterprise physical security systems, access control platforms, security integrations, and IP-based communication environments
- Perform system upgrades, integrations, acceptance testing, and commissioning activities while ensuring alignment with university standards, operational requirements, and risk management objectives
- Diagnose and resolve complex technical issues involving access control systems, security hardware, system configurations, and application workflows
- Develop and maintain technical documentation, system procedures, configuration records, and process improvements to enhance system reliability, compliance, and operational efficiency

StableCoupons Inc

Remote

Product Analyst

February 2024 – Present

- Analyzed business issues and converted stakeholder needs into structured system requirements, process flows, and technical documentation
- Created workflow diagrams, user stories, and specifications to support system enhancements and integrations
- Led cross-functional teams and resources, utilizing agile methodologies to oversee project timelines and scope, delivering features on schedule
- Conducted UAT planning and execution, validating functionality against business requirements and documenting defects
- Maintained system protocols and process documentation, including procedures, decision logs, and training materials

Intermountain Health

Salt Lake City, UT

Apprentice – Information Systems

May 2023 – November 2023

- Gathered business and technical requirements for IT systems, ensuring alignment with compliance standards and operational workflows
- Streamlined service delivery through implementation of a JIRA-based ticketing system, improving incident response time by 30%
- Conducted system testing, identified issues, and updated procedures and documentation to support system accuracy and reliability
- Collaborated with security, IT, and clinical teams to align systems with enterprise policies and integration needs

Tynergy Technology Corp

Salt Lake City, UT

Project Analyst Intern

January 2023 – August 2023

- Documented project scope, system requirements, functional needs, and stakeholder expectations for web-based systems
- Supported system testing and defect tracking, validating requirements and ensuring proper system functionality
- Facilitated status meetings with development teams to track project progress, identify bottlenecks, and make necessary adjustments
- Collaborated with developers and vendors to resolve issues and support project timelines

Ideal Engineering

India

Project Engineer

August 2016 – February 2020

- Led installation, testing, and maintenance of facility infrastructure systems, including access-controlled environments and security-related components

- Coordinated with vendors, contractors, and internal teams to execute system upgrades, installations, and integrations
- Developed SOPs, procedures, and system documentation, improving compliance and reducing operational downtime
- Managed project records, maintenance logs, vendor communications, and documentation needed for compliance audits

SKILLS

Project Management: Roadmap development, scope definition, schedule creation, resource allocation, project tracking

Physical Security: CCure 9000, Access Control Systems, System Commissioning, Intrusion Detection Systems, Security Hardware Troubleshooting, Enterprise Security Operations

Tools/Technologies: Power Automate, JIRA, CCure 9000, MS Office Suite, PostgreSQL, Power BI, JIRA, System Surveyor

Networking & Infrastructure: IP-Based Security Systems, TCP/IP Fundamentals, Network Troubleshooting, System Connectivity Analysis, Device Communication

Business Analysis: User story development, requirements gathering, process mapping, UAT, systems documentation

Technical Capabilities: System troubleshooting, data analysis, SOP development, system integration support

Soft skills: Cross-functional leadership, problem-solving, adaptability, inclusive mindset, stakeholder communication, IT/Finance/Procurement liaison

LEADERSHIP & PROJECTS

- **Solar Water Pump:** Developed a solar powered water-pump with automatic level controller to conserve resources
- **CISA Training:** Delivered comprehensive training on Information Systems, focusing on process documentation and user needs analysis. Developed skills in creating and maintaining detailed project records and providing clear instructions
