

Jyoti Sondagar

New York, NY | 410-776-8148 | jyotisondagar@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFILE

Designer & Strategist with **10+** years building scalable UX systems and **7+** in multi-disciplinary design, leading design across B2B and D2C products, 2D/3D solutions, and AI-powered experiences. Translates user research into product strategy and revenue shaping strategic vision, raising the craft bar organization-wide, and prototyping the future before the roadmap catches.

EDUCATION

Parsons School of Design - The New School <i>M.S. in Strategic Design and Management Dean's Merit Scholarship</i>	New York, NY
NSID - Saurashtra University <i>B.A. in Interior Design Graduated with Distinction</i>	Rajkot, India

ACHIEVEMENTS & RECOGNITION

IEEE ICAD - Presented Research Paper with Authorship - 2026 RAG-Enhanced Explainable AI for Regulatory-Compliant Credit Risk Assessment Designed and evaluated a RAG pipeline to improve model transparency and regulatory legibility in credit risk systems, presented findings at IEEE ICAD 2026, contributing to discourse on human-legible AI and responsible deployment.	Boston, MA
Web Marketing Awards - Judge, 30th Annual WebAwards - 2026 Selected as an industry judge to evaluate and recognize excellence in website development and digital experience design across global submissions.	USA
Beyond Tomorrow Hackathon - Judge, 4000+ project participants from the globe - 2026 Invited to assess innovative solutions from the next generation of technologists and designers, providing expert evaluation across creativity, feasibility, and real-world impact.	USA
Peer Reviewer - ACM & IEEE, 20+ Conference Research Papers & Posters Contributed rigorous academic peer review across 20+ submissions for two of the world's most prestigious computing and engineering societies, supporting the integrity of scholarly publishing.	

WORK EXPERIENCE

Dynamic Build <i>Design Strategy Lead UX Product Design & Research</i>	New York, NY June 2022 - Present
0-1 Product Vision: Defined design vision and strategy for a B2B SaaS platform, driving \$1.8M in revenue within 17 months. - Set the strategic vision for the consumer experience, securing executive alignment across design, research, and engineering through rapid prototyping, journey mapping, and strategic storytelling. - Shaped product roadmap through design clarity, partnering with product and engineering leadership to influence the most complex, high-impact initiatives. - Delivered executive-level reporting and cross-functional alignment across stakeholders and vendors, translating analytical insights into strategic recommendations that informed product direction.	
Design Strategist: Turned user research to business strategy, shaping product direction, and drove design thinking across teams. - Synthesized qualitative and quantitative research into actionable product strategy, translating user needs into roadmap priorities that directly influenced business outcomes and revenue growth. - Bridged the gap between user insight and executive decision-making, presenting research-backed design rationale that reframed product bets and roadmap sequencing. - Drove design thinking organization-wide, embedding user-centered principles across product, engineering, and marketing teams through workshops, critiques, and cross-functional collaboration.	
Design Ownership: Owned the full design lifecycle across web, iOS, Android, and tablet from research through final execution. - Boosting user satisfaction by 18% and user experience and retention by 14% through revamping the website interface, utilizing user-centered design principles for feedback sessions of over 21 users. - Facilitating a 26% reduction in discrepancies through the collaboration of cross-disciplinary teams of engineers, product managers, and executives to deploy proficiency and cohesiveness across web, iOS, Android, and tablet platforms. - Built detailed prototypes that illuminated product direction, helping cross-functional teams make faster, higher-confidence decisions at every stage.	
Design Leadership: Established design standards and critique culture that elevated quality organization-wide. Instituted a regular design review process, setting the bar for craft, interaction quality, and design rationale across a	

cross-functional 30-person team.

- Mentored through feedback and modeled high-craft execution, advocating for user-centered principles at every level of the organization as a senior IC without direct reports.

AI-Powered Design : Integrated AI tooling into the design lifecycle to accelerate exploration and expand market reach.

- Integrated AI-powered 2D/3D features into the product, using Claude Code and ChatGPT to accelerate exploration and prototyping, expanding market reach by **22%** while maintaining WCAG compliance.

Brand & visual Identity: Led brand design and information architecture, growing cross-platform reach by **33%**.

- Designed visual identity and marketing campaigns that grew cross-platform brand reach by **27%**, owning information architecture, content strategy, and user flows end-to-end.

Prestige Metals (Family Business at Rajkot, India)

Remote

Product Designer | Product Strategy & UX | B2B SaaS, precious metals industry

June 2016 - June 2021

Platform Design 0-1: Designed a B2B SaaS inventory platform, serving 100+ clients in the precious metals trading industry.

- Boosted operational efficiency by **42%** through optimized workflows and information architecture through conceptualizing and developing a data-rich B2B SaaS inventory management platform, enabling real-time reporting and actionable insights.
- Integrated interactive 3D and 2D product with strategic UX principles and business objectives to align visual integrations with core company targets, facilitating business growth and immersive product interactions.
- Collaborated cross-functionally with over 15+ stakeholders by synthesizing diverse insights in order to define strategies, roadmaps, and data-informed experiences therefore aligning user needs with business outcomes.

Research & GTM Strategy: Led multi-method user research and co-authored a GTM research plan that directly shaped product and go-to-market decisions.

- Executed mixed-method research including A/B testing, usability testing, and heuristic evaluations to refine platform UI and API documentation while identifying key pain points, translating user insights into measurable feature enhancements.
- Conducted qualitative and quantitative user testing on UserTesting.com across iOS/Android, B2B website, and API docs, turning insights into targeted design improvements across every touchpoint.
- Co-authored a research plan defining target accounts, dashboard features, pricing elasticity, and GTM methodology, directly informing strategic go-to-market decisions
- Developed a scalable design system and component library that increased user engagement by **44%** while improving consistency, collaboration, and design efficiency across teams.

Design System: Built a 0-1 design system from scratch, lifted brand engagement **37%** and raised the quality floor across the org.

- Established interaction patterns, component standards, and documentation adopted across a team of 8, creating a shared design language that accelerated delivery and reduced design-to-engineering friction.
- Defined how the design system should evolve, setting contribution guidelines and versioning standards that kept the system scalable as the product grew.

SR+A Architects

Mumbai, India

Designer

Sep 2013 - Nov 2015

Project Design & Management: Designed and executed 25-building urban development projects end-to-end with interior on time and, close collaboration with clients.

- Led design coordination for a 25-building mixed-use development, accelerating project delivery by **26%** through workflow optimization, strategic planning, and multidisciplinary collaboration.
- Directed and mentored 12+ designers across research, prototyping, documentation, and execution, improving design quality and cross-functional collaboration throughout project delivery.
- Produced executive presentations and stakeholder documentation that informed strategic planning and organizational decision-making across large-scale projects.
- Established standardized design processes and a unified visual language that strengthened stakeholder engagement and consistency across project deliverables.
- Applied user-centered research and iterative prototyping methodologies to improve spatial experiences while balancing client goals, technical constraints, and business requirements.

Parthenon Architects

Mumbai, India

Senior Interior Designer

Aug 2011 - Aug 2013

- Executed the design development for 5+ interior projects, with clients' collaboration to comprehend preferences and budgets.
- Elevated 10% efficiency and accelerated the design process by controlling the distinctive design execution methodologies.
- Performed comprehensive quantity takeoffs and material pricing, ensuring accurate and competitive bids, and collaborating with project managers, architects, and engineers to develop cost-effective solutions and value engineering options.

Design Matrix

Mumbai, India

Interior Designer

Oct 2010 - June 2011

- Spearheaded the design development for two high-end luxury residential and hotel interiors. Ensured seamless collaboration between site surveyors, engineers, and design teams to deliver projects on time and within budget.
- Cultivated strong client relationships by exceeding expectations, translating their vision into design solutions that met their needs, budgetary constraints, and design intent.
- Demonstrated exceptional strategic planning and systems-thinking to navigate ambiguity and successfully lead large-scale design initiatives from concept to execution.

DCOOP

Interior Designer

Mumbai, India

June 2008 - Sep 2010

- Led research and design contributions for a nationally recognized study on India's future architectural landscape, presented at the ARCM Exhibition in Amsterdam, Netherlands.
- Built and scaled a comprehensive design resources library by integrating 100+ product catalogs and vendor networks, enabling tailored solutions across varied client budgets and project scopes.
- Partnered with senior architects across the full design lifecycle, from concept ideation to final execution, driving innovative, high-quality outcomes that met client vision and project benchmarks.
- Spearheaded finish and furniture curation aligned with design intent, coordinating directly with vendors to procure samples and technical specifications, ensuring seamless and on-schedule project delivery.

PROJECTS

NASA Space Expo - Collaborated with Parsons School of Design

New York, NY

- Designed and pitched a strategic roadmap to help NASA navigate its shifting role in commercializing the Low Earth Orbit (LEO) economy by proposing a framework for public-private partnerships and identifying industry barriers.

GDGC Hackathon - United Nations' 17 Sustainable Development Goals

New York, NY

- Developed a prototype for a user interface solution by leveraging Google technology in the conducting of user-centric research while developing key strategies in targeting one of the United Nations' 17 Sustainable Development Goals.

Canadian Government - Collaborated with Parsons School of Design

New York, NY

- Led a research-driven innovation initiative for 350,000+ TBS Canada GC employees to strengthen organization-wide innovation culture. Identified engagement gaps and implemented user-centric workshops focused on collaboration, experimentation, and strategic communication.

ARCAM Gallery - Urban Design Research recognition and exhibition

Amsterdam, Netherlands

- Conducted in-depth research on India's evolving architectural landscape while analyzing urban design trends and future development frameworks.

COMMUNITY & LEADERSHIP

IEEE - Senior Member | Ongoing

USA

- Recognized at the senior grade for significant contributions to the engineering and technology profession, reflecting sustained impact in research and industry

Women in Tech Global - Member | Ongoing

- Actively engaged with a global network of women technologists to advocate for gender equity, share knowledge, and drive inclusive innovation across the industry.

Self-Initiated Mentorship Program | Ongoing

- Independently founded and led a mentorship initiative focused on empowering women in India by providing guidance, resources, and encouragement to pursue education and careers in technology.

SKILLS

Skills: Figma, Sketch, Adobe Creative Suite, Adobe XD, Jira, Miro, Notion, Power BI, AutoCAD, 3DS Max, Lovable, Product Vision & Road-mapping, Iterative Design, Executive Alignment, Design Systems, Service Design, Cross-Functional Leadership, User Interviews, Mixed-Methods Research, Usability Testing, A/B Testing, Heuristic Evaluations, Journey Mapping, Persona Development, Wire-framing, Interaction Design, Information Architecture, Rapid Prototyping, Story-boarding
