PROFILE

With 14+ years of IT experience, I specialize in Java/J2EE technologies, cloud services, and Angular front-end development. My extensive background includes working with cloud providers like Azure and AWS to efficiently migrate and modernize applications. I leverage my skills in microservices architecture, Spring Boot, and modern web technologies to create scalable, high-performance solutions. My experience ensures smooth project delivery and innovative problem-solving.

SUMMARY

- Proven expertise in **Java and J2EE technologies**, developing scalable, high-performance applications for diverse business needs.
- Successfully designed, implemented, and managed cloud-based solutions using **Amazon AWS** services like EC2, S3, Lambda, and RDS, ensuring optimized resource utilization and cost-efficiency.
- Leveraged **Microsoft Azure** for efficient deployment, management, and modernization of applications, enhancing system performance and scalability.
- Extensive experience in front-end **Angular Development** with AngularJS and Angular (versions 7 to 18), creating dynamic, responsive, and user-friendly web applications.
- Transformed monolithic applications into **Microservices Architecture** using REST APIs, Spring Boot, Spring Cloud Config, and Netflix OSS, improving system maintainability and agility.
- Expertise in **Database Management** and working with SQL and NoSQL databases, ensuring efficient data storage, retrieval, and management to support application requirements.
- Experience in **Modernizing Legacy Applications**, migrating them to cloud platforms like AWS and Azure, driving operational efficiency and business growth.
- Collaborated effectively with **Cross-Functional Teams** to deliver high-quality solutions, ensuring project success and alignment with business objectives.
- Proficient in using automation build tools like **KARMA and Jasmine** for unit testing Angular applications, ensuring code quality and reliability.

EDUCATION AND CERTIFICATIONS

- Master of Computer Application - MCA**
Osmania University | Hyderabad, India
2007 - 2010
- Bachelor of Computer Sceince**
SK University | AP, India
2004 - 2007
- Oracle Certified Professional**
Java SE Programmer
- AWS Certified Developer**

WORK EXPERIENCE

PROJECT ENVIRONMENT ->

- Java 17
- Spring 4.3
- Restful web services
- Angular 18
- SpringBoot 3.3
- Node JS 20
- Micro Services
- Amazon AWS

PROJECT ENVIRONMENT ->

- Java 11 and 17
- Spring and SpringBoot
- Restful web services
- Angular
- Node JS
- DB2 database
- Micro Services

PROJECT ENVIRONMENT ->

- Java
- Spring Boot
- Restful web services
- Angular
- Node JS
- Oracle
- Micro Services

PROJECT ENVIRONMENT ->

- Java 11
- AWS
- Node JS
- Restful web services
- Angular 8
- SpringBoot
- Microsoft SQL server
- Micro Service

PROJECT ENVIRONMENT ->

- Java 1.8
- Spring 4.3
- Restful web services
- Angular 5
- Node JS
- Jboss EAP 7
- Phoenix Framework.

Fidelity Investments - Durham NC

MAY 2023 – PRESENT

Principal Full Stack Engineer

- Designed and managed cloud solutions on Amazon AWS, optimizing resource utilization and ensuring cost-efficiency.
- Migrating on-premise applications to cloud environments, ensuring seamless transitions and optimized resource utilization.
- Created microservices-based applications using SpringBoot 3.3, enabling efficient deployment.
- Modernizing legacy JSP and AngularJS applications, migrating them to Angular 18 for enhanced performance and user experience.
- Transformed monolithic applications into microservices architecture for improved maintainability and agility.

Bank Of America - Charlotte NC (Remote)

NOV 2021 – MAY 2023

Senior Full Stack Engineer

- Developed RESTful web services to enable smooth communication and integration between microservices in the cloud.
- Developed server-side application using Spring Boot, Spring MVC, and Hibernate; wrote DAO layer and Spring Controller for data handling
- Implemented CI/CD pipelines to automate the deployment process, ensuring faster and more reliable software releases.
- Redesigned monolithic applications into microservices architecture for improved scalability, maintainability, and performance.
- Leveraged Java 11,17 advanced features to develop robust and scalable applications.

Capital One, Virginia (Remote)

MAR 2021 – NOV 2021

Senior Full Stack Engineer

- Involved in Software Development Life Cycle (SDLC), including requirement gathering, design, coding, and testing.
- Used Java 8 and 11, Spring Boot, Spring JPA, Spring Batch, Microservices, and DBeaver.
- Integrated applications with AWS services (EC2, S3, Lambda, CloudWatch logs).
- Used Amazon CloudWatch to monitor AWS services and application logs.
- Developed Java API for Amazon Lambda to manage AWS services.
- Experience with Docker containers for CI/CD pipeline development using Jenkins.
- Developed UI components and completed Angular migration work successfully

J.B Hunt Transport - Arkansas (Remote)

FEB 2020 – MAR 2021

Technology Lead Developer

- Deployed applications on Azure by using AppDynamics.
- Involved in JPA Repository for data storage and retrieval using Spring JPA
- Used Docker, spring Boot, JBOSS, Azure, Elastic.
- Worked with Technical Leads to understand user requirements and develop/test technical solutions.
- Detailed understanding of Azure database offerings Relational, NoSQL, Datawarehouse]
- Built S3 buckets and managed policies for S3 buckets and used S3 bucket and Glacier for storage and backup on AWS

Bank Of America - Charlotte NC

JUN 2018 - FEB 2020

Senior Full Stack Engineer

- Involved in JPA Repository for data storage and retrieval using Spring JPA
- Extensively used Angular 5.0 and Phoenix Bank of America Framework to make UI code simple and consistent CashPro-Bank of America portal.
- Worked on new re-branding changes across Bank of America CashPro portal.
- Developed and consumed REST web services for portal data.
- Wrote modular, secure, and well-tested using Jasmine and Spring Junit frameworks.

WORK EXPERIENCE

JP Morgan Chase - NY, USA

Senior Java Full Stack Engineer

MAR 2017 - JUN 2018

- Used Amazon Web Services (AWS), including EC2 and Elastic Beanstalk.
- Fully involved in developing applications with efficient configuration using Spring Boot.
- Extensively used Spring IOC module for core functionalities to develop applications.
- Utilized MongoDB and Mongo Repository for data storage and retrieval.
- Participated in daily stand-ups and scrum calls, presenting product demos for each sprint.
- Involved in bug fixes and team discussions on new features.
- Worked closely with designers and marketers to quickly ship new front-end experiments.
- Wrote modular, secure, and well-tested front-end code in JS, HTML, and CSS using the latest web technologies.

State Farm Insurance - HTC Global Services - India

Technology Lead Developer

OCT 2014 - SEP 2016

- Developed impressive plans for deliverables through regular meetings and calls with OSCs and team members.
- Implemented AngularJS for the front-end presentation tier.
- Utilized Spring AOP to implement required functionalities.
- Provided three-way authentication using Spring Security.
- Implemented coding for data storage and retrieval.
- Involved in writing code for parallel connection between host and database.
- Collaborated with cross-functional teams to deliver high-quality solutions, ensuring project success and meeting business objectives.

State Farm Insurance - HTC Global Services - India

Sr. Software Development Engineer

JAN 2013 - SEP 2014

- Converted HTML prototypes to dynamic pages using JSP and UI tags.
- Used jQuery for developing UI dashboard.
- Developed functionalities using Spring and Hibernate.
- Designed JSP pages to display forms.
- Wrote and executed unit test cases, involving JUnit testing.
- Participated in daily stand-up meetings as part of the Agile Scrum process.
- Reviewed code developed by the team.
- Actively involved in the company's recruitment process.

State Farm Insurance - HTC Global Services - India

Software Developer

FEB 2011 - OCT 2012

- Involved in developing Struts actions and Form Beans.
- Developed functionalities using Spring AOP.
- Designed JSP pages to display forms.
- Implemented coding for data storage and retrieval.
- Developed Java, Spring, Hibernate, SQL/HQL code using Eclipse.
- Involved in developing Hibernate code.
- Converted requirements to design elements, created sequence and flow diagrams.
- Applied Agile methodologies in project management, ensuring iterative development.

Birla Soft (India)

Trainee

APRIL 2010 - FEB 2011

- Developed Struts and OJB DAO components.
- Involved in form validation using Struts.
- Wrote and executed unit test cases, and participated in integration testing.
- Wrote queries for given functionalities.
- Assisted the integration testing team and system testing team with any issues.
- Maintained technical and functional documentation for all deliverables.

PROJECT ENVIRONMENT ->

- Java 1.8
- Spring 4.0
- AWS
- Restful services
- Spring Boot and Spring Security
- Mongo DB,
- Micro Services.
- AngularJS 1.5, 1.7

PROJECT ENVIRONMENT ->

- Java
- MYSQL workbench
- Spring and JPA
- ORestful services
- Redis
- XML
- jQuery and Jqgrid
- AngularJS 1.2

PROJECT ENVIRONMENT ->

- Core Java
- Spring 3.0
- JQuery
- Hibernate 3.2
- Eclipse 3.6
- MYSQL 5.7.2
- Tomcat 6.0
- GIT

PROJECT ENVIRONMENT ->

- Java
- Spring Framework
- JPA - Hibernate
- Weblogic
- DB2
- SVN

PROJECT ENVIRONMENT ->

- Java
- Struts 1.2 Framework
- JDBC
- ANT
- Netbeans
- Apache Tomcat
