WORK EXPERIENCE

City of Modesto

Modesto, CA

Software Analyst (ERP Systems Analyst)

Apr 2024 – Present

ERP Administration: **Administer Oracle EBS supporting 1,000+ employees** across finance, HR, procurement, and payroll systems.

- Coordinated two annual Oracle EBS patch cycles, production support, and change management activities while maintaining system reliability.
- Configured workflows, approval hierarchies, and security across 10+ departments, strengthening accounting controls and financial reporting.
- Resolved 5–10 production support tickets monthly through root cause analysis and Oracle Support collaboration.

Business Systems Analysis: **Improved operational efficiency by 40% by optimising ERP workflows across 10M+ records.**

- Partnered with 20+ stakeholders to gather business requirements, document functional specifications, and recommend ERP enhancements.
- Automated manual processes through 10+ Power Automate forms to improve data integrity and reporting accuracy.
- Created SOPs, process documentation, and business workflows supporting Oracle EBS enhancements.

ERP Implementation & Testing: **Delivered Oracle EBS integration projects** through requirements gathering, testing, and deployment.

- Managed Oracle EBS integration with AssetWorks by coordinating API configuration, SIT, UAT, regression testing, and production deployment.
- Tracked defects, validated production readiness, and maintained SDLC documentation throughout implementation.
- Coordinated cross-functional teams to deliver system enhancements with minimal business disruption.

Financial Reporting & User Support: Supported **financial operations** by delivering reporting, training, and end-user support.

- Generated Oracle SQL and SSRS reports supporting month-end, year-end, and fiscal close activities.
- Trained 50+ end users on Oracle EBS and reporting tools, increasing system adoption across departments.
- Developed 10+ user documentation and troubleshooting resources that improved ERP support efficiency.

Anaheim Ducks (NHL)

Irvine, CA

Student Data Analyst

Jan 2023 – June 2023

- Increased customer retention by 25% by developing predictive models using Python, R, regression analysis, Random Forest, and ARIMA across a database of 50,000+ customers.
- Improved marketing ROI by 15% by designing Tableau dashboards that translated complex analytical findings into actionable business insights for executive leadership.
- Ensured reporting accuracy across multiple enterprise datasets by performing SQL validation, quality assurance testing, and production data verification before business reporting.

Bank of America

Gandhinagar, India

Software Engineer (Financial Systems)

July 2021 – July 2022

- Developed Oracle SQL financial data pipelines processing more than 50M annual transactions, supporting enterprise financial systems, API integrations, and regulatory reporting across multiple business units.
- Reduced audit errors by 40% across 500+ monthly reporting cycles by performing root cause analysis, variance investigations, production support, and issue resolution tracked through Jira.
- Increased operational efficiency by 20% by collaborating with six cross-functional teams throughout the SDLC to develop SQL- and Python-based reporting solutions supporting financial reporting and business operations.
